
Atlas of cancer incidence and mortality
of the
Association of Population-based Cancer Registries in Germany
(GEKID)

„The GEKID Atlas“

Results of the projection for Germany

(data delivery: March of 2016)

Citation: Association of population-based cancer registries in Germany. Atlas of cancer incidence and mortality in Germany (GEKID-Atlas). Data submission December 2014. Lübeck, 2015. Available from

<http://www.gekid.de>

Summary

The GEKID Atlas presents new cancer cases (incidence) and the mortality of cancer on the federal state level (Bundesländer) for 28 selected cancer sites or cancer groups respectively as well as for all cancer sites. The incidence rates in the federal states registered by the population-based cancer registries serve as a basis for the atlas. The data are presented as age-standardized rates (per 100,000 persons per year, Europe standard population) and also as absolute numbers. Additionally, a summarized rate and a projected number of cases are presented for Germany.

To avoid misinterpretations of the data please see the separate method paper.

On the basis of the projections an age-standardized cancer rate (Europe standard population) of 447 per 100,000 was calculated for all cancer sites (without non-melanoma skin cancer) for males and of 345 per 100,000 for females. So the age-standardized rates are nearly constant over the last years.

The rates correspond to 260,000 new cancer cases for men and 225,000 new cancer cases for women. Totally, a number of 485,000 new cancer cases were calculated for Germany in 2013. Compared with the last years the absolute incidence rates slightly increased due to the demographic change.

The projected data are used as reference to evaluate and to assess the disease numbers of the several federal states. Please note, by the reason of belated notifications the shown rates and case numbers (incidence) can change in retrospect. In case of a data update all data were updated not only the current year of diagnosis. From experience, an increasing of three to four percent is expected for the current year of diagnosis. Earlier year has fewer changes. Mortality data do not change.

3 All cancer sites without non-melanoma skin cancer (C00-C97, D09.0, D41.4 without C44)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

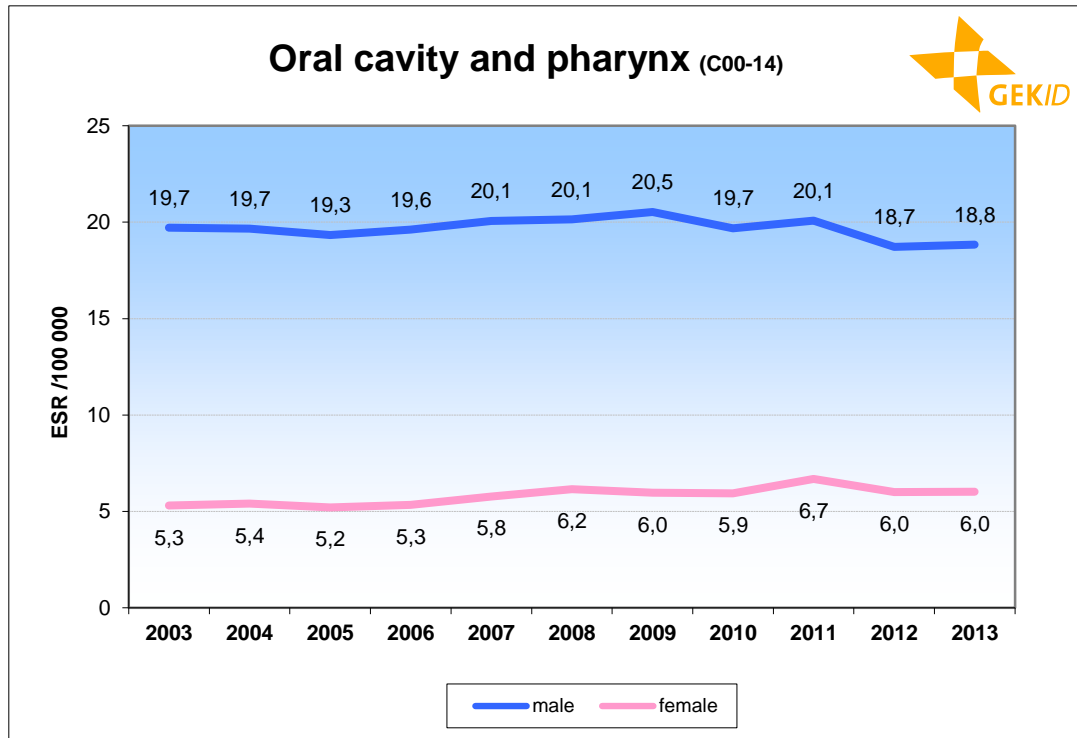

Number of new cases (Projection for Germany)

Data source: data pool of the epidemiological cancer registries of GEKID, www.gekid.de

4 Oral cavity and pharynx (C00-C14)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

5 Oesophagus (C15)

Age-standardized incidence rate (Projection for Germany)

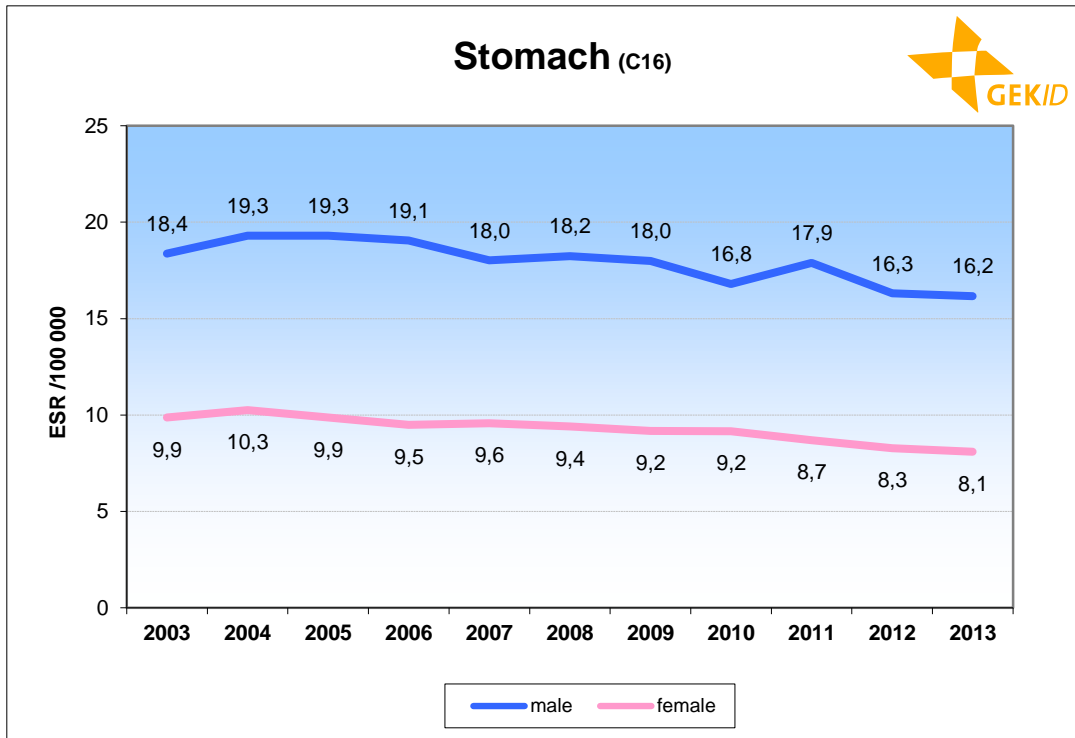

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

6 Stomach (C16)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

7 Colon and rectum (C18-C21)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

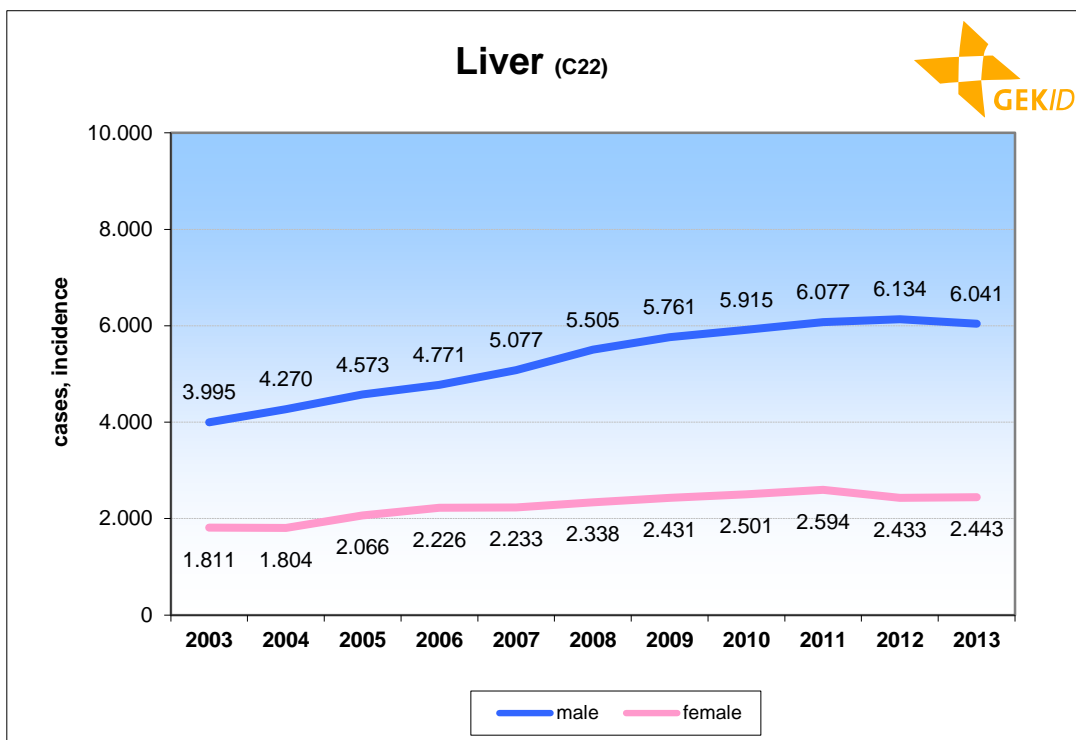

8 Liver (C22)

Age-standardized incidence rate (Projection for Germany)

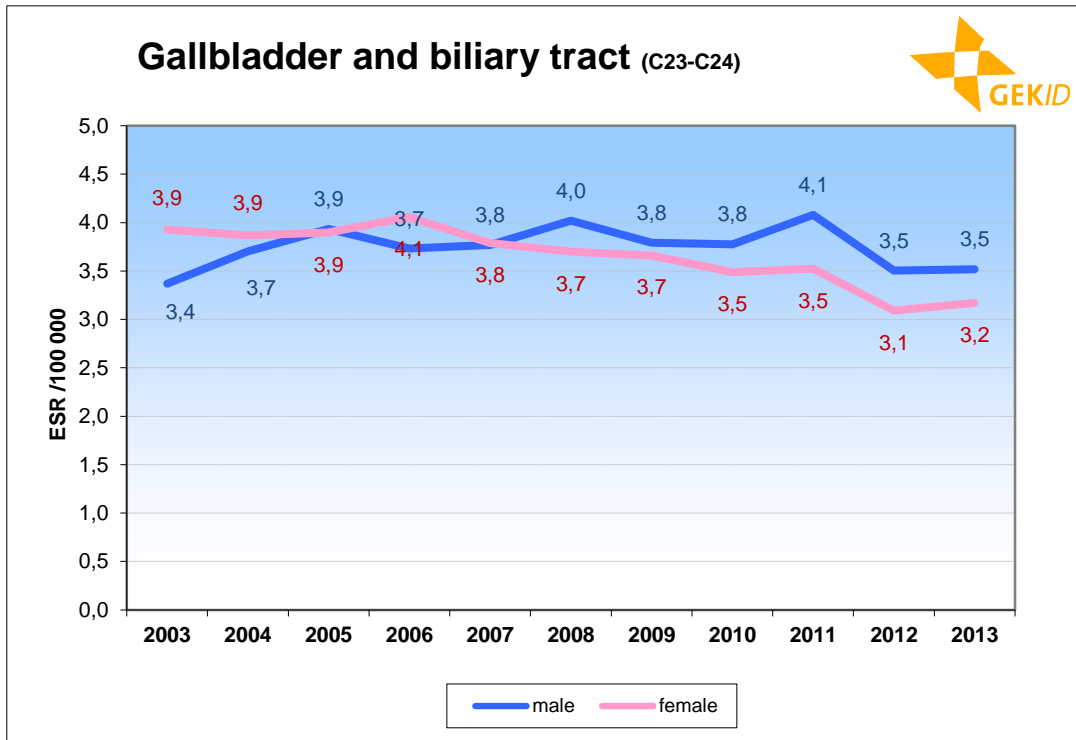

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

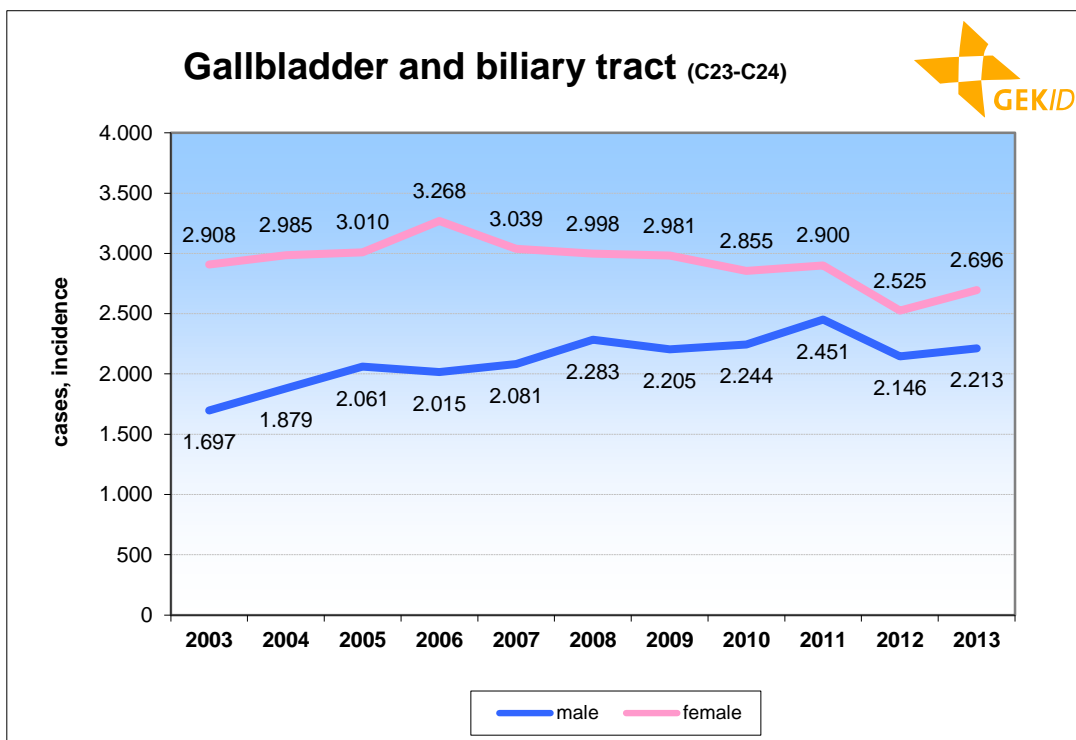

9 Gallbladder and biliary tract (C23-C24)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

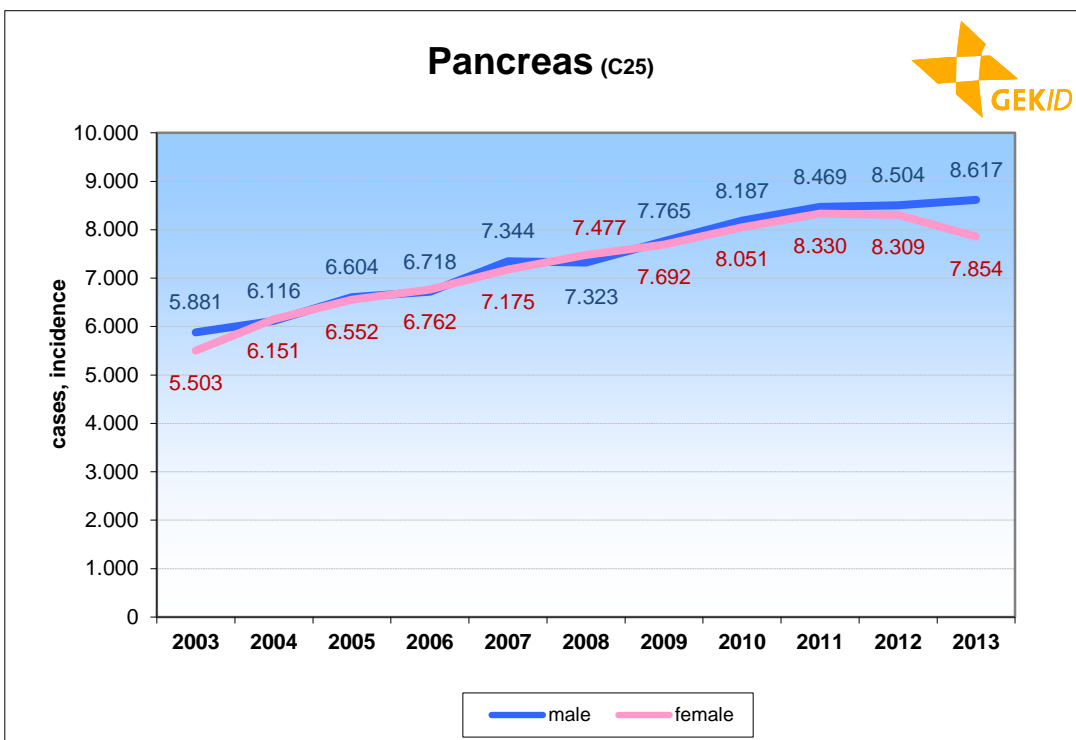

10 Pancreas (C25)

Age-standardized incidence rate (Projection for Germany)

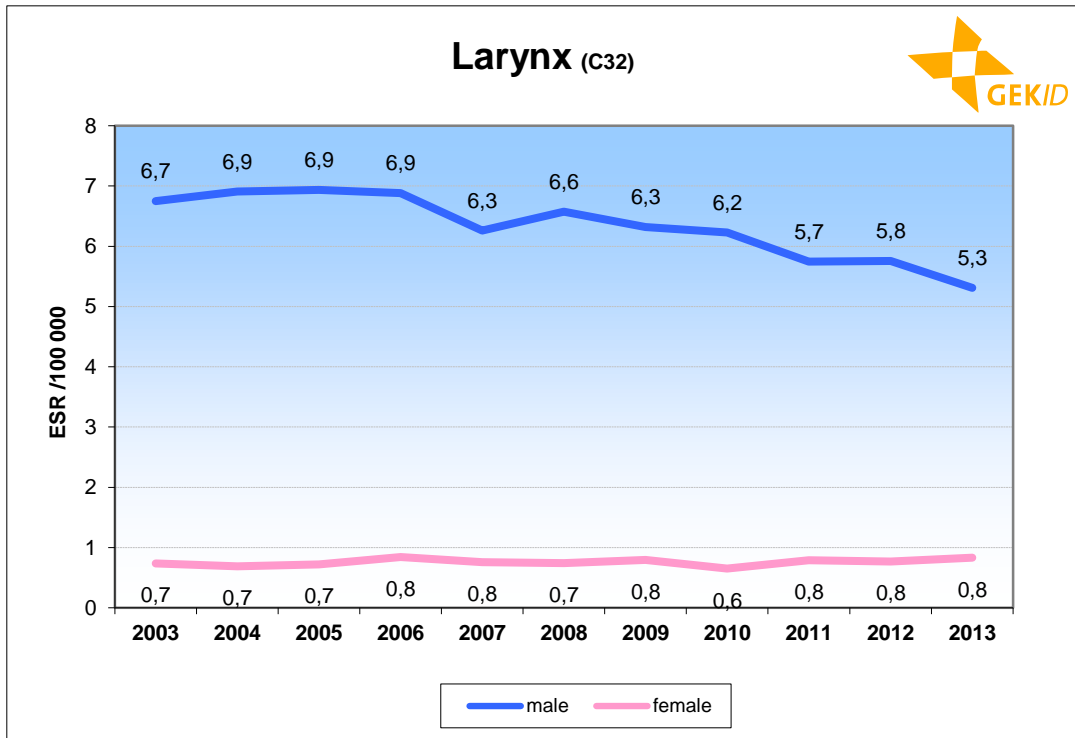

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

11 Larynx (C32)

Age-standardized incidence rate (Projection for Germany)

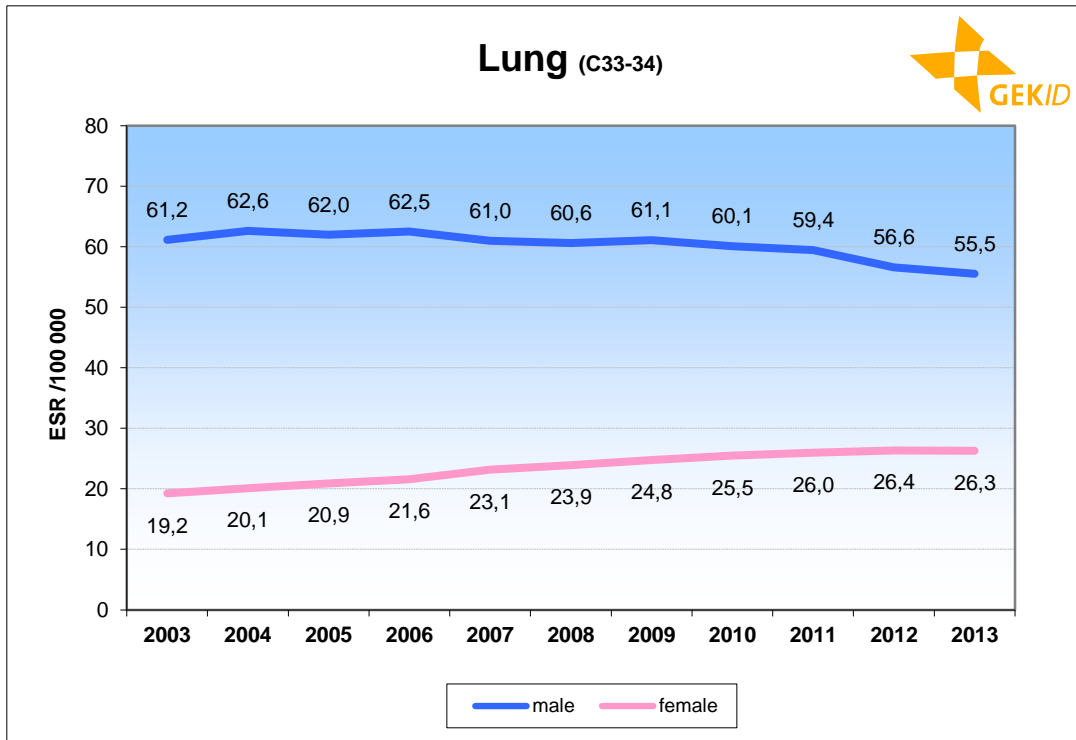

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

12 Lung (C33-C34)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

13 Malignant melanoma of the skin (C43)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

14 Non-melanoma skin cancer (C44)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

15 Mesothelioma (C45)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

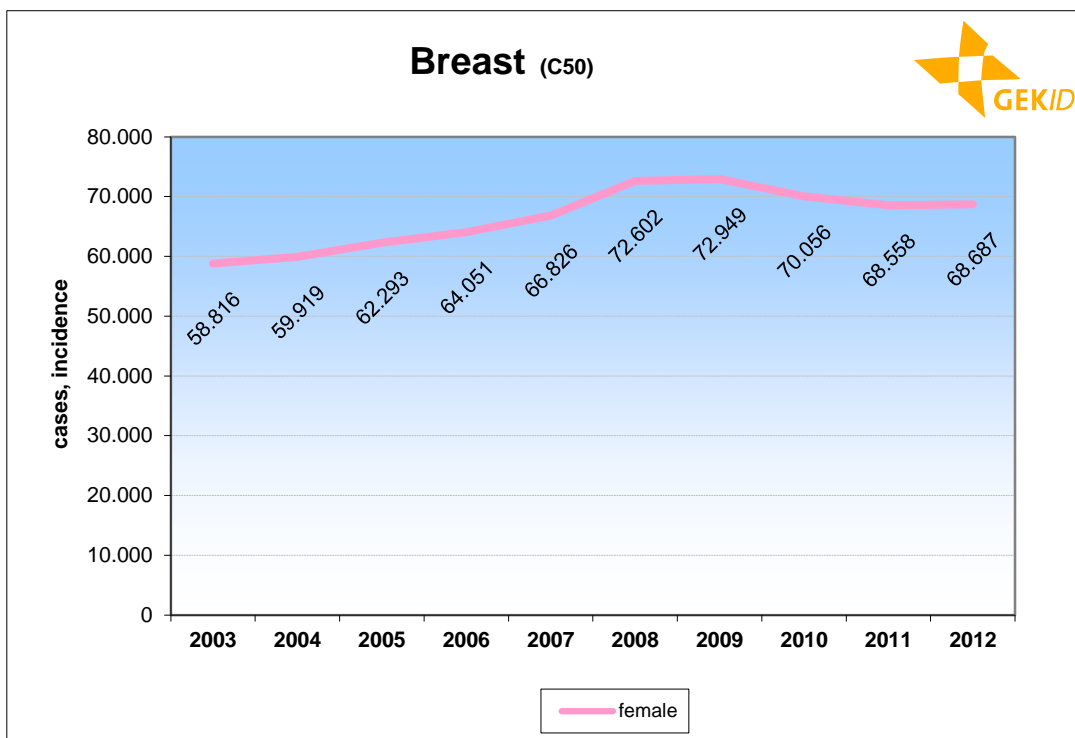

16 Breast (C50)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

17 Vulva (C51)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

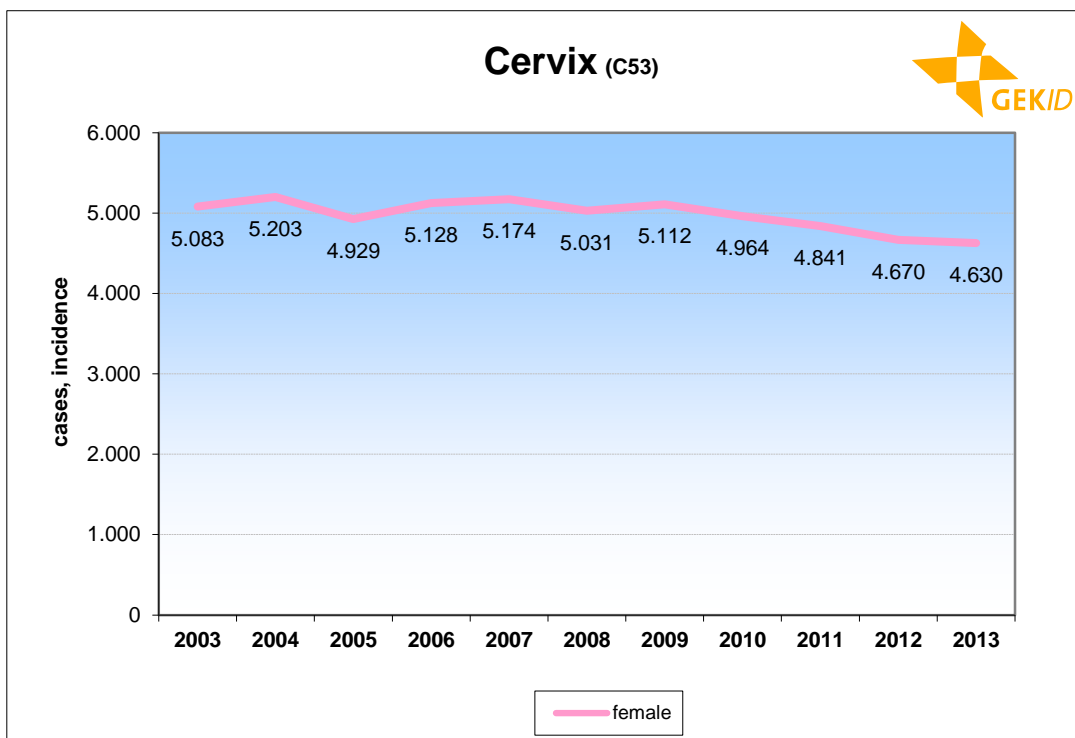

18 Cervix (C53)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

19 Uterus (Corpus uteri) (C54-C55)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

20 Ovaries (C56)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

21 Prostate (C61)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

22 Testis (C62)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

23 Kidney (C64)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

24 Bladder (C67, D09.0, D41.4)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

25 Brain and nervous system (C70-C72)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

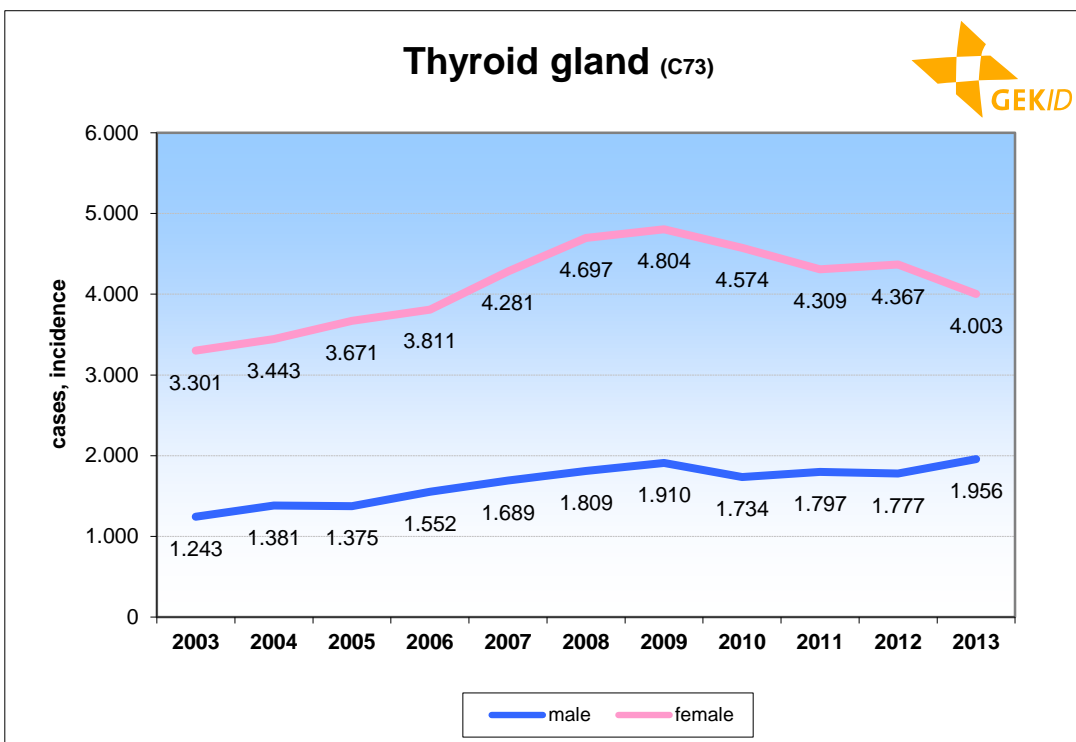

26 Thyroid gland (C73)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

27 Hodgkin's Lymphoma (C81)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

28 Non-Hodgkin-Lymphomas (C82-C86, C96)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

29 Immunproliferative disease and plasme cell neoplasms (C88-C90)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

30 Leukaemias (C91-C95)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)

31 Leukaemias and lymphomas (C81-C96)

Age-standardized incidence rate (Projection for Germany)

ESR = age-standardized rate with the Europe standard population

Number of new cases (Projection for Germany)
